WIRELESS TANK LEVEL SYSTEM

Smart Water presents to you the SW800, a fully wireless tank level system. This state of the art product has been designed and built in New Zealand to the highest levels of quality and performance. The Smart Water system will not just accurately indicate the level of your tank, it will show you how many days usage remain, alert you if there is a leak and even wirelessly control your pump. Affordably priced and designed to withstand New Zealand's harsh environment, Smart Water is the complete solution in tank water management.
